

SERVICE TOOLS

**optibelt
OPTIKRIK 0, I, II, III**
for measuring the tension
of V-belts, kraftbands,
and ribbed V-belts

Regularly use the tension gauge to check if the V-belt, the kraftband or the ribbed V-belt is running properly in your vehicle. Handling the measuring gauges is simple. Our field service team will be happy to assist you.

**optibelt
MEASURING GAUGE**
for measuring inner lengths
of V-belts, timing belts
and ribbed V-belts

The **optibelt MEASURING GAUGE** is the perfect aid for measuring inner lengths. It is possible to measure lengths between 500 and 2500 mm.

Please note: All inner lengths determined are only reference values! Determination of exact lengths must be carried out according to DIN / ISO / RMA standard.

optibelt LASER POINTER II
for the precise alignment
of the drive

OPTIBELT recommends the handy **optibelt LASER POINTER II** for aligning drives. Alignment is easier because it is not necessary to hold a levelling cord and the powerful and bright laser beam is visible on the silver target magnets.

The assembly engineer can perform alignment quicker and more accurately. Less friction means less wear on pulleys and belts, longer running time, thus resulting in fewer downtimes. Reduction in spare parts costs. In the case of severe or large drives therefore, use of several the **LASER POINTER II** pays off already in the first month of purchase.
